2016 Noel-Levitz Student Satisfaction Inventory Results Summary

Survey Administration

- The Noel Levitz Student Satisfaction Inventory (SSI) is administered at TAMU-CC every two years (March and April of even-numbered years).
- The survey, which is administered at participating institutions nationwide, includes questions related to the importance students give to certain institutional attributes and their satisfaction with these same attributes.
- A random stratified sample of classrooms was selected. Each college of the university had the same proportion of students as their proportion of the class enrollment, in addition to similar proportions of upper level, lower level, and graduate courses. Students in the designated classes were offered the opportunity to participate in the survey.
- 54 classes were designated to be a part of the random sample, and the professors in these courses were asked to participate.
- 2000 students were enrolled in these classes, and 1,050 of these students participated in the survey.
- The participation rate was 52%. This was far less than the 2012 participation rate of 73%.
